

Mock Exam Information Evening

19th October 2023

“Success is the **sum of small efforts**, repeated day in and day out.”

Robert Collier (1972)

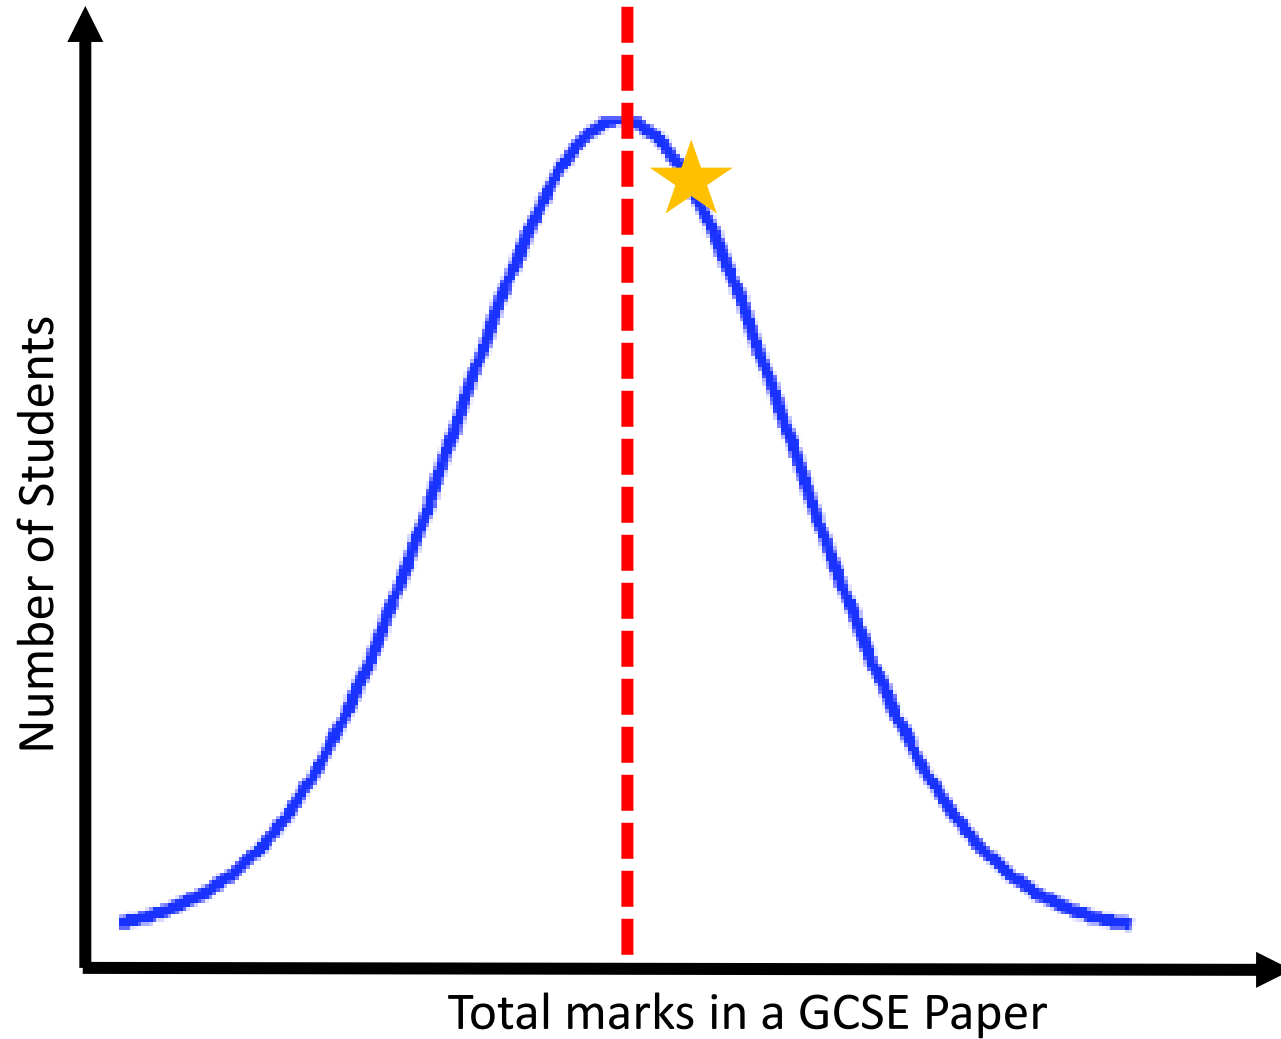

Introduction - APO

- Assessment Plan for the Year (3 phases/races)

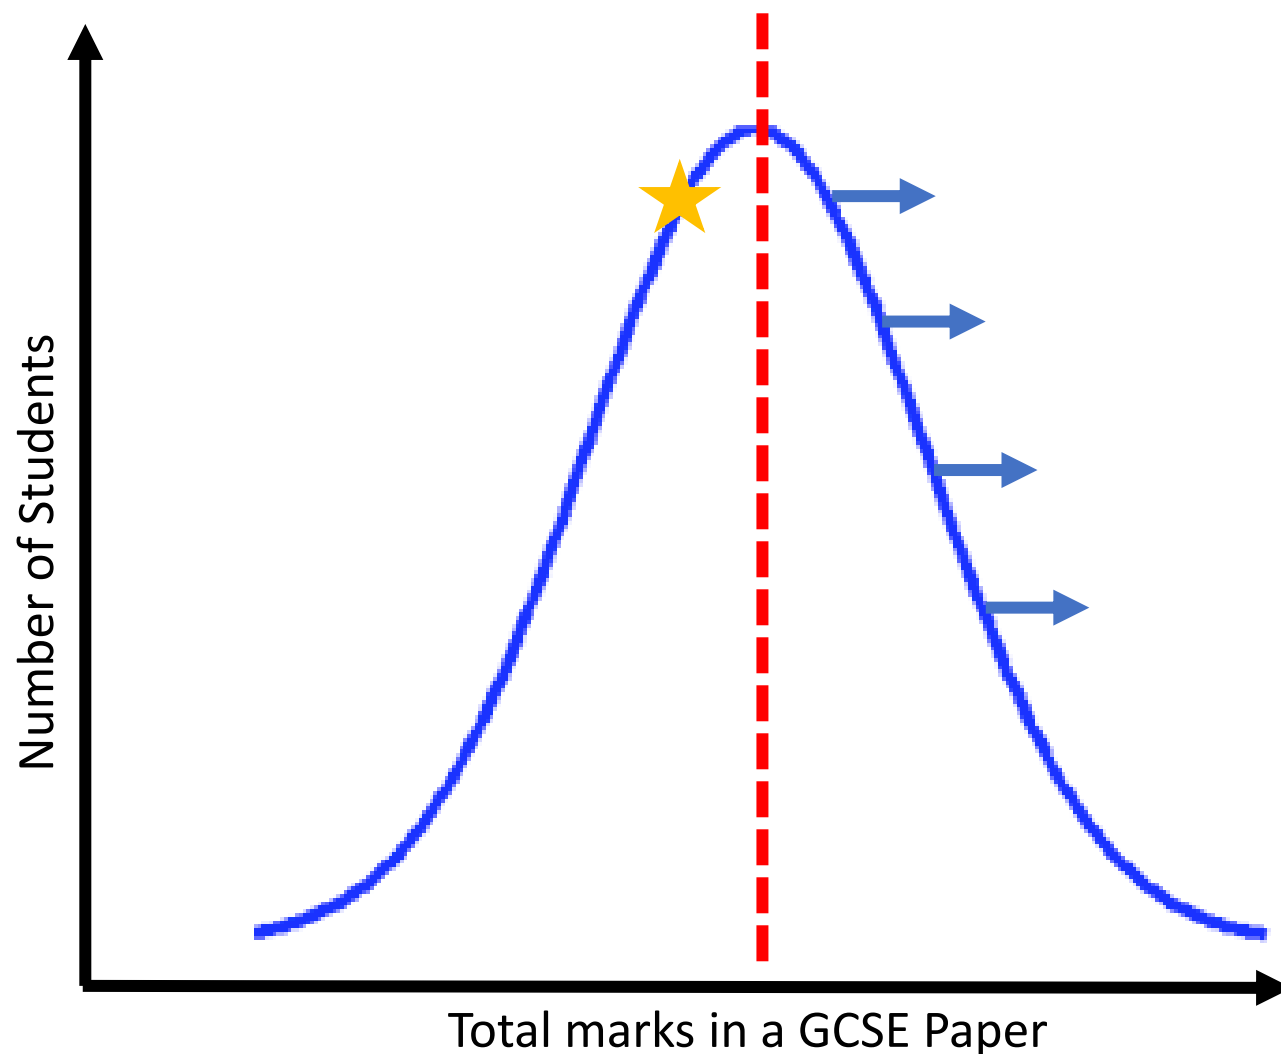

'Be Selfish For Your Grade'

- The GCSE process is competition with approximately 900,000 other people.
- The top 50% of those people will achieve at least a 5 in any given subject.
- The grade boundaries will change every year depending on the marks students get in their exams.

'Be Selfish For Your Grade'

'Be Selfish For Your Grade'

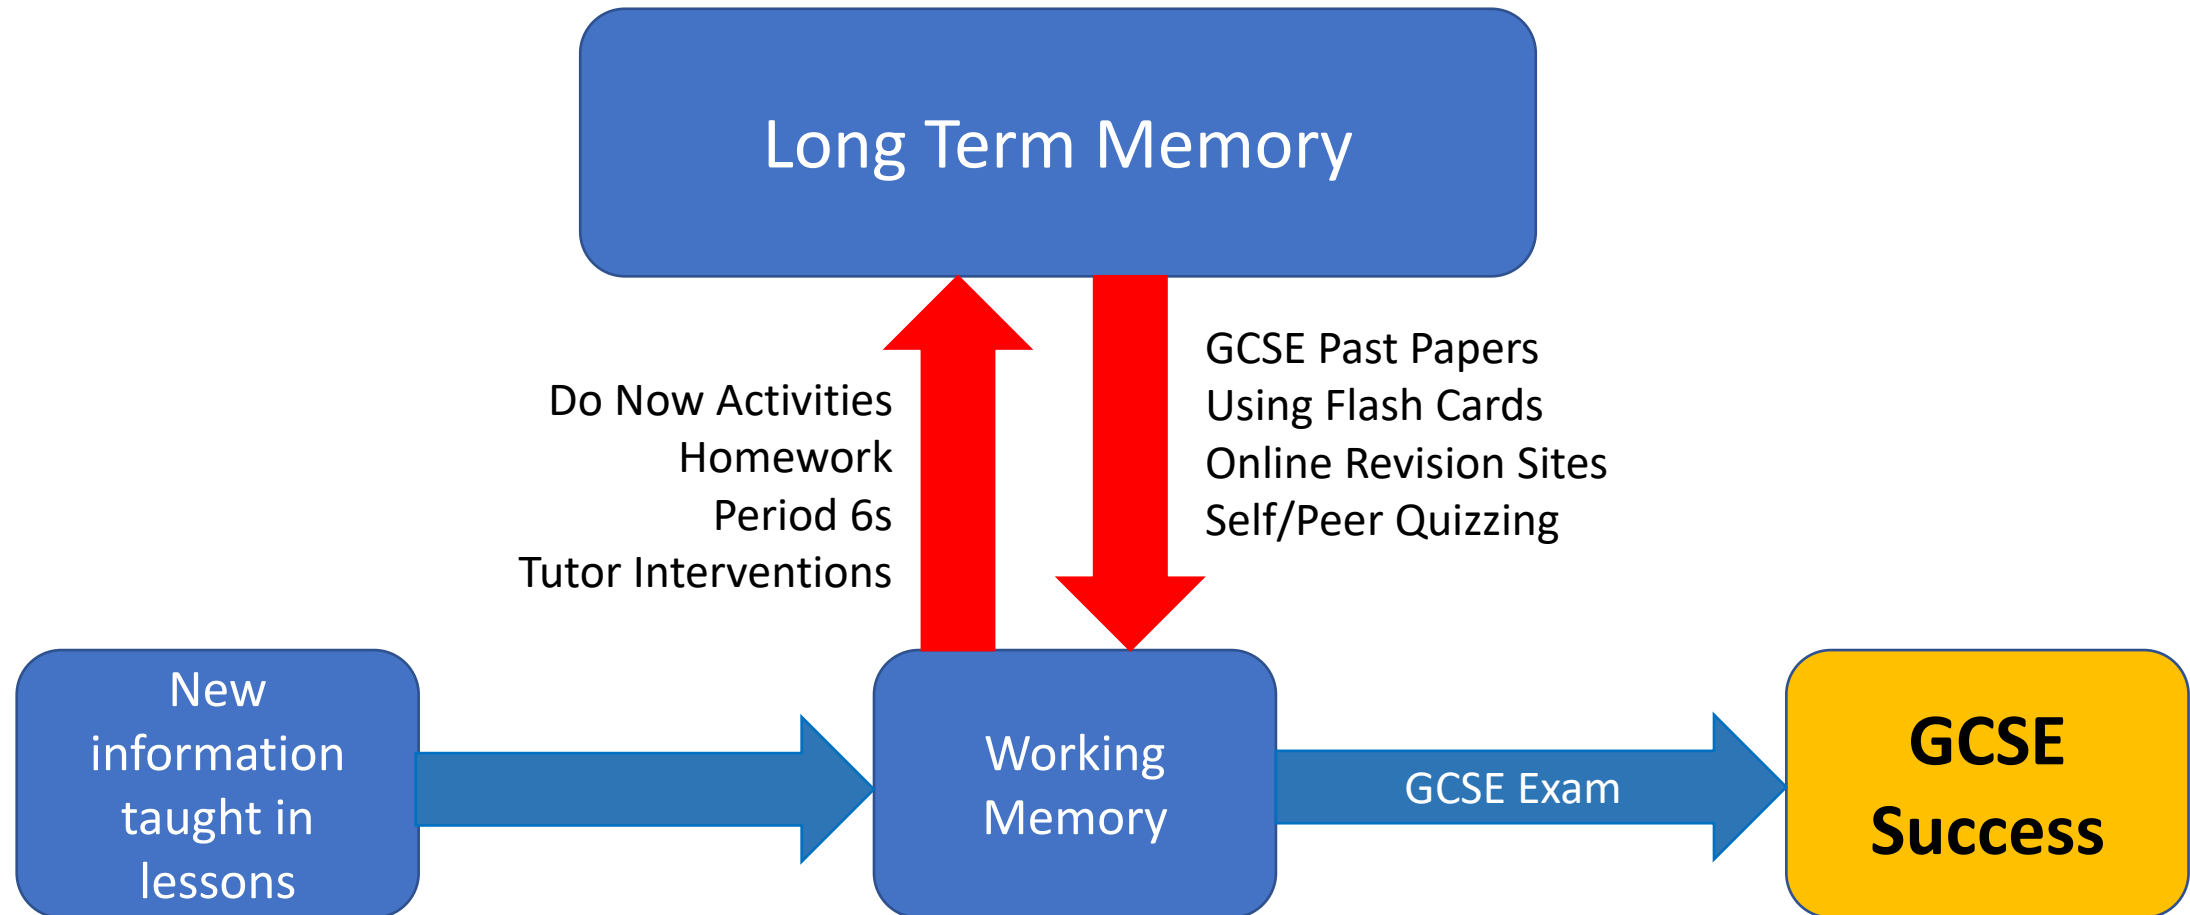

If other students do more revision, more homework, attend more revision classes then the curves moves along because the other students perform better.

And the grade boundary goes up!!!

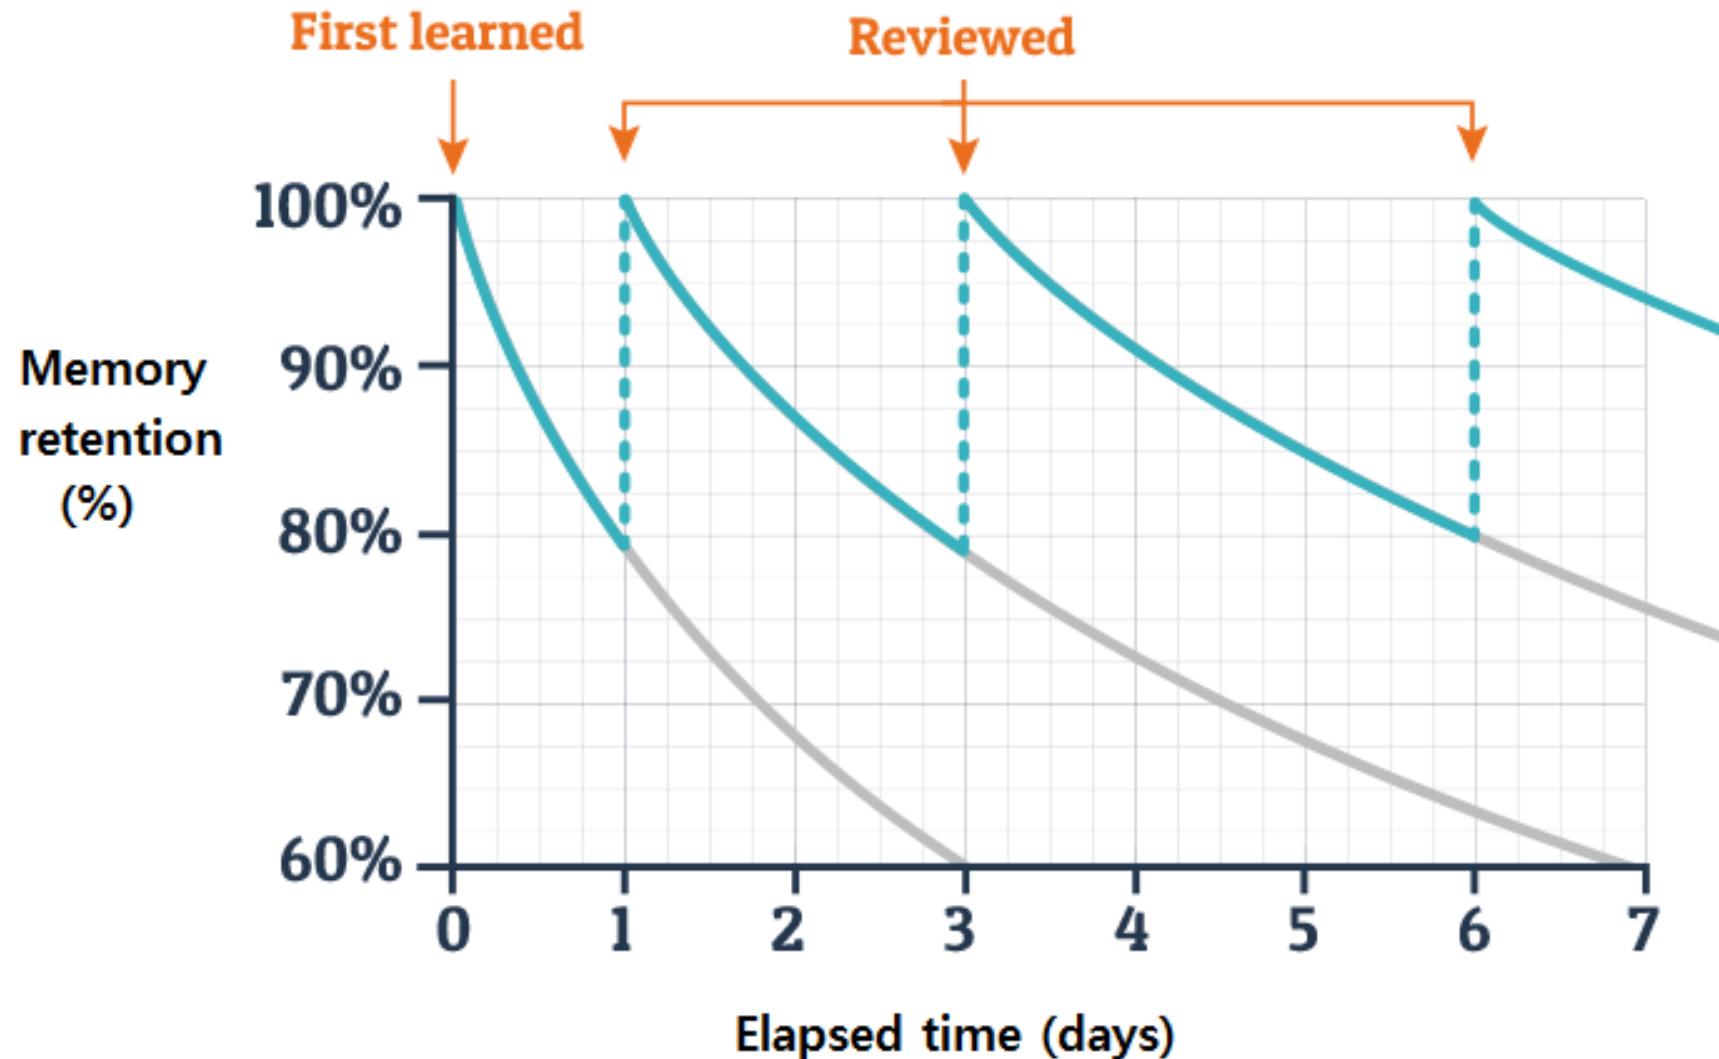

Working Memory vs Long Term Memory

- Every person has a long term memory and a working memory.
- A long term memory is vast and contains huge amounts of information. Information in here, will stay there for a very long time.
- The working memory is a small, limited memory that is used to carry out tasks. The working memory can only perform a limited number of tasks at one time.
- The aim is to store information your long term memory and be able to retrieve it and write it in an exam paper.

Working Memory vs Long Term Memory

Why Revision Is Important

Revision Strategies - MGI

- Flash Cards
- Self Quizzing
- Past Papers
- Write, Cover, Check, Repeat
- Etc
